The insights in this study are drawn from a recent global YouGov custom survey on the topics of automation and artificial intelligence covering 17 global markets and nearly 19,000 respondents out of which 1008 were UAE respondents.

YouGov is a global provider of analysis and data generated by registered panellists in more than 55 markets. As the market research pioneer of Multilevel Regression with Poststratification (MRP) for accurate predictions at a granular level, our data consistently outperforms others on accuracy, as concluded by Pew Research. Combine that with our advanced analytical technology, powered by YouGov Crunch, and we are able to generate the most accurate, complete, and dynamic portrait of the world.
